Yum! Brands, Inc. - Forests 2020

F0. Introduction

F0.1

(F0.1) Give a general description of and introduction to your organization.

Yum! Brands, Inc., based in Louisville, Kentucky, has over 50,000 restaurants in more than 150 countries and territories primarily operating the Company’s brands – KFC, Pizza Hut, and Taco Bell – global leaders of the chicken, pizza, and Mexican-style food categories. Starting at end of the first quarter of 2020 the Company’s family of brands includes The Habit Burger Grill, a fast-casual restaurant concept specializing in made-to-order chargrilled burgers, sandwiches and more. In 2019, Yum! Brands was named to the Dow Jones Sustainability North America Index and ranked among the top 100 Best Corporate Citizens by Corporate Responsibility Magazine.

F0.2

(F0.2) State the start and end date of the year for which you are reporting data.

<table>

<tr>
<td>Soy</td>
<td>Retailing</td>
<td>We have elected to focus on timber, palm oil, and cattle during this reporting cycle as we have set and are working toward meeting goals in these areas. We acknowledge that all commodities which impact deforestation are important and are evaluating reporting in additional areas in the future. Soy is used in our products as an oil, secondary ingredient, and as animal feed for our animal proteins. Most of soy is used as an embedded, secondary ingredient for which we don't have direct insight or control. We are working to better understand this supply chain so we can provide more transparency and help identify risk over time, with an initial focus on the direct sourcing of poultry purchasing. We recognize that the soy supply chain is very complex and the process for accessing data and accurately reporting will require a phased approach. Our ongoing work with WWF and the Accountability Framework for an ethical supply chain will be critical to guiding our path forward, which will include setting commitments, taking action and demonstrating progress in regard to our deforestation free commitment, traceability and monitoring and verification. This includes a landscape analysis and strategic plan to better understand how to reduce deforestation risks.</td>
</tr>
<tr>

% of procurement spend
6-10%

Comment
Based on our position in the supply chain as a quick-service restaurant company, we procure paper-based packaging manufactured for our food products and in our own printed marketing materials. Paper-based packaging is then used to serve, transport, protect and market our food products. Our provided procurement spend has been estimated from submitted global survey responses and is used to approximate our total spend.
Palm oil

Activity
Retailing/onward sale of commodity or product containing commodity

Indonesia
Malaysia
Peru
Thailand

% of procurement spend
1-5%

Comment
Based on our position in the supply chain as a quick-service restaurant company, we procure manufactured palm oil for use as cooking oil to prepare products such as fried chicken. Many markets use alternative cooking oils. Our procurement spend on palm oil has been estimated from submitted global survey responses. Countries of origin for palm oil are based on information received through the global supplier survey. As such, there may be markets that receive supplies from additional countries.

Cattle products

Activity
Retailing/onward sale of commodity or product containing commodity

United States of America

% of procurement spend
6-10%

Comment
Our beef use is largely by our Taco Bell brand. Over 90% percent of the restaurants are located within the United States and the vast majority of the brand's beef sourcing is from the United States. Over 99% of our beef comes from origins of lower deforestation risk. Countries of origin for beef are based on information received through the global supplier survey. As such, there may be markets that receive supplies from additional countries. This is the first year of reporting and we will continue to improve data collection in the future.
(F1.2) Indicate the percentage of your organization’s revenue that was dependent on your disclosed forest risk commodity(ies) in the reporting year.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Timber is used as a raw material for our paper-based packaging, which is primarily a vehicle to serve, transport, protect, and market our food products. As such, revenue is not dependent on this commodity as alternative commodities could likely be sourced to supplement and/or replace paper-based packaging, if needed. We do not calculate revenues generated from our paper-based food packaging as it is not sold independently of our food products. Secondly, our policy and goal for paper-based packaging supports both the sustainable forest management of the raw material and the amount of recycled content going into the manufactured product; the two factors are weighted equally and not evaluated separately (e.g. one’s impact on revenue compared to the other’s). Therefore, we do not know the percent of revenue dependent on timber alone and have selected less than 1%.

Palm oil is used primarily for cooking oil as well as an ingredient for some food products in some markets. As such, revenue is not dependent on this commodity as alternative commodities could likely be sourced to supplement and/or replace its use, if needed. We don’t calculate revenues generated from palm oil alone because it is not sold as an independent final food product. As a result, we have selected less than 1%.

We do not calculate revenues generated by beef alone. Beef is used as a food ingredient. It is used primarily by Taco Bell which comprises about 15% of our total restaurant count. Based on percentage of procurement for food and packaging for beef in the United States we have extrapolated an estimate of system sales that could be considered to be linked to beef.

Soy, Other - Rubber, Other - Cocoa, Other - Coffee are not applicable.

(F1.5) Does your organization collect production and/or consumption data for your disclosed commodity(ies)?

<td>Please explain</td>
<td>We issued a global survey for our entire business, through our brands, requesting that all suppliers report on packaging products containing timber (via fiber used in paper packaging) used in our restaurants 2019. Data from our business units included responses from franchisees and suppliers. We were pleased to include data representing 91% of our global store count of over 50,000 restaurants. For restaurants that were not represented by the survey results, we have either added an estimate based on submitted data from the previous reporting period or added an estimate of consumption based on a per restaurant average from reporting restaurants. This methodology provides the means to ensure full representation. The resulting total volume collected from the global survey was cross-checked on an average volume per restaurant basis within our markets. This comparison confirmed that the total reported consumption was reasonable and within the bounds of expectations. Therefore, we are disclosing an estimate of our full consumption data using our partial actual data received in response to our survey.</td>

We issued a global survey for our entire business, through our brands, requesting that all countries report on packaging products containing timber (via fiber used in paper-based packaging). In our 2019 survey, we requested all global timber suppliers to report the states, provinces, and regions within the country of origin (if known). We were pleased to include data representing 91% of our global store count of over 50,000 restaurants. For restaurants that were not represented by the survey results, we have either added an estimate based on submitted data from the previous reporting period or added an estimate of consumption based on a per restaurant average from reporting restaurants. Reporting gaps associated with countries of origin have been estimated based on reported location of timber production facilities. Based on the results of the 2019 survey, timber sourced from Argentina is estimated to represent 0.02% of our total timber volume and is sourced from the Buenos Aires region.

- **Forest risk commodity**: Timber products

Proxy data does not provide an accurate confirmation of country of origin compared to actual survey responses, so we have selected "Unknown" for the purposes of this disclosure.
Please explain

We issued a global survey for our entire business, through our brands, requesting that all countries report on palm oil used for cooking purposes in our restaurants. In our 2019 survey, we requested all global palm oil suppliers to report the states, provinces, and regions within the country of origin (if known). We were pleased to receive responses representing an estimated 99% of our global store count of over 50,000 restaurants. For restaurants that were not represented by the survey results, we have either added an estimate based on reported location of the palm oil mill and/or refiner. Based on the results of the 2019 survey, palm oil sourced from Indonesia is estimated to represent 48.22% of our total palm oil volume and is sourced from the Sumatra, Bengkulu, Kalimantan, Banten, Bangka, Belitung regions. Detailed location information regarding the proportion sourced from each jurisdiction is not available at this time.

Please explain

We issued a global survey for our entire business, through our brands, requesting that all countries report on palm oil used for cooking purposes in our restaurants. In our 2019 survey, we requested all global palm oil suppliers to report the states, provinces, and regions within the country of origin (if known). We were pleased to receive responses representing an estimated 99% of our global store count of over 50,000 restaurants. For restaurants that were not represented by the survey results, we have either added an estimate based on reported location of the palm oil mill and/or refiner. Based on the results of the 2019 survey, palm oil sourced from Indonesia is estimated to represent 48.22% of our total palm oil volume and is sourced from the Sumatra, Bengkulu, Kalimantan, Banten, Bangka, Belitung regions. Detailed location information regarding the proportion sourced from each jurisdiction is not available at this time.

For restaurants that were not represented by the survey results, we have either added an estimate based on submitted data from the previous reporting period or added an estimate of consumption based on a per restaurant average from reporting restaurants. Based on the results of the 2019 survey, palm oil sourced from countries of low deforestation risk represents 5.80% of our total palm oil volume. These countries include China and the Dominican Republic. Pursuant to CDP Guidance, our volumes from these countries have been disclosed together within this row.

### For Beef (Cattle Products)

#### Brazil

**Country/Area of origin**
- Brazil

**State or equivalent jurisdiction**
- Specify state/equivalent jurisdiction (Minas Gerais, Goiás, Mato Grosso, Mato Grosso do Sul)

**% of total production/consumption volume**
- 0.49

**Please explain**
We issued a global survey for our entire business, through our brands, requesting that all countries report on beef used in our restaurants. In our 2019 survey, we requested all global beef suppliers to report the states, provinces, and regions within the country of origin (if known). We received responses representing an estimated 70% of our Pizza Hut and Taco Bell restaurants (KFC does not use a material amount of beef). For restaurants that were not represented by the survey results, we added an estimate of consumption based on a per restaurant average from reporting restaurants. Based on the results of our 2019 analysis, beef sourced from Brazil is estimated to represent 0.49% of our total beef volume and is sourced from the Minas Gerais, Goiás, Mato Grosso, and Mato Grosso do Sul regions. Detailed location information regarding the proportion sourced from each jurisdiction is not available at this time. Please note that this is our first year of reporting this commodity and we look forward to continued improvement in data collection in the future.

#### Guatemala

**Country/Area of origin**
- Guatemala

**State or equivalent jurisdiction**
- Don't know

**% of total production/consumption volume**
- 0.23

**Please explain**
We issued a global survey for our entire business, through our brands, requesting that all countries report on beef used in our restaurants. In our 2019 survey, we requested all global beef suppliers to report the states, provinces, and regions within the country of origin (if known). We received responses representing an estimated 70% of our Pizza Hut and Taco Bell restaurants (KFC does not use a material amount of beef). For restaurants that were not represented by the survey results, we added an estimate of consumption based on a per restaurant average from reporting restaurants. Based on the results of our 2019 analysis, beef sourced from Guatemala is estimated to represent 0.23% of our total beef volume. Detailed location information regarding the states / provinces of origin is not available at this time. Please note that this is our first year of reporting this commodity and we look forward to continued improvement in data collection in the future.

#### Malaysia

**Country/Area of origin**
- Malaysia

**State or equivalent jurisdiction**
- Specify state/equivalent jurisdiction (Bandar Baru Bangi)

**% of total production/consumption volume**
- 0.14

**Please explain**
We issued a global survey for our entire business, through our brands, requesting that all countries report on beef used in our restaurants. In our 2019 survey, we requested all global beef suppliers to report the states, provinces, and regions within the country of origin (if known). We received responses representing an estimated 70% of our Pizza Hut and Taco Bell restaurants (KFC does not use a material amount of beef). For restaurants that were not represented by the survey results, we added an estimate of consumption based on a per restaurant average from reporting restaurants. Based on the results of our 2019 analysis, beef sourced from Malaysia is estimated to represent 0.14% of our total beef volume and is sourced from the Bandar Baru Bangi region. Please note that this is our first year of reporting this commodity and we look forward to continued improvement in data collection in the future.

#### Unknown origin

**Country/Area of origin**

This methodology provides the means to ensure full representation. Based on the results of the 2019 survey, beef sourced from countries of low deforestation risk represents 92.32% of our total beef volume. These countries include Canada, Costa Rica, El Salvador, Ireland, Taiwan, Tunisia, United Kingdom and and United States of America. Pursuant to CDP Guidance, our volumes from these countries have been disclosed together within this row.

F1.6

(F1.6) Has your organization experienced any detrimental forests-related impacts?

Yes

F1.6a

(F1.6a) Describe the forests-related detrimental impacts experienced by your organization, your response, and the total financial impact.

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Timber products</th>
</tr>
</thead>
<tbody>
<tr>
<td>Impact driver type</td>
<td>Reputational and markets</td>
</tr>
<tr>
<td>Primary impact driver</td>
<td>Increased cost of certified sustainable material</td>
</tr>
<tr>
<td>Primary impact</td>
<td>Increased operating costs</td>
</tr>
</tbody>
</table>

**Description of impact**
Sustainably certified products, such as palm oil and fiber-based products can result in increased costs. We mitigate these costs, as much as possible, through supply chain procurement as well as strategic specifications. In some market, in particular to certified fiber-based packaging, increased costs have been an impediment to supplying fully certified products. Due to the large, decentralized nature of our organization and our ability to source from multiple regions, the scale of this impact is not likely to rise to the level of “substantive.”

**Primary response**
Engagement with suppliers

**Total financial impact**

**Description of response**
Sustainably certified products fiber-based products can result in increased initial costs. We mitigate these costs, as much as possible, through supply chain procurement as well as strategic specifications. In some market, in particular to certified fiber-based packaging, increased costs have been an impediment to supplying fully certified products. We are unable to provide the financial impact. However, we have experienced an increase in cost for certified sustainable materials including palm oil and fiber-based products. This varies according to market and according to the material.

**Description of response**
Sustainably certified products such as palm oil can result in increased initial costs. We mitigate these costs, as much as possible, through supply chain procurement as well as strategic specifications. In some market, in particular to certified fiber-based packaging, increased costs have been an impediment to supplying fully certified products. We have provided the estimated increase in cost based on 2019 reported volume data and average pricing. It a global number covering all restaurants.

---

**Forest risk commodity**
Cattle products

**Impact driver type**
Reputational and markets

**Primary impact driver**
Increased stakeholder concern or negative stakeholder feedback

**Primary impact**
Increased operating costs

**Description of impact**
Many of our investors are aware of the environmental risks of deforestation and have expressed concern. We have received shareholder proposals and have directly engaged with them on the topic. We continue to investigate vegetarian options and meat alternatives as our menu constantly evolves to meet the preferences of our customers. We acknowledge the growing concern for sustainable beef and are involved in organizations such as the Roundtable for Sustainable Beef to promote the sustainability of this commodity. As such, we do not currently anticipate the scale of this impact to rise to the level of “substantive.”

**Primary response**
Participation in sector-wide and/or multi-stakeholder agreements

**Total financial impact**

**Description of response**
Yum! endorsed the New Declaration on Frosts (NYDF) and believe it is an important step toward us meeting the private sector goal of elimination deforestation from the production of agricultural commodities and halving the rate of loss of natural forests globally by 2020 and striving to end natural forest loss by 2030. We are continuing to expand reporting in this space, through a focus on CDP. This year we have added Cattle to our disclosures and Soy is on the roadmap for future. Yum! has worked with WWF to conduct a global supply chain risk assessment across our food and agricultural commodities and well as working with them specially on a Brazil landscape assessment that will inform our future sourcing strategy and reporting. At this time we are unable to provide the financial impact.

---

**F2. Procedures**

**F2.1**

*(F2.1) Does your organization undertake a forests-related risk assessment?*

Yes, forests-related risks are assessed

**F2.1a**

Please explain
All corporate risks, including any deforestation risks associated with timber, are evaluated in our enterprise risk management framework. It is led by our Risk Committee and addresses a wide range of topics including environmental and social factors. Risk analysis is presented at the quarterly Board Audit Committee meeting. Additionally, as part of our supply chain management process, we survey our business units around the world regarding their progress against our sustainable fiber sourcing goal annually. This frequency is based on the data needs to help us manage our efforts as well as our public reporting cycle. This helps us identify potential deforestation risk relating to meeting our goal of 100% sustainable sourcing by the end of 2020. In addition, in 2018 we completed a long-term Supply Chain Sustainability Risk Assessment with WWF to identify and prioritize the environmental and social risks attributed to key commodities, including forest risks commodities. We continued work in 2019 with WWF by conducting a landscape analysis for Brazil Tools, methods, and data sources referenced for biodiversity and forest risk include: WWF’s Global 200 priority ecoregions, Ramsar Sites, World Database on Protected Areas, and Alliance for Zero Extinction (AZE) sites.

All corporate risks, including any deforestation risks associated with palm oil, are evaluated in our enterprise risk management framework. It is led by our Risk Committee and addresses a wide range of topics including environmental and social factors. Risk analysis is presented at the quarterly Board Audit Committee meeting. Additionally, as part of our supply chain management process, we survey our business units around the world regarding their progress against our sustainable fiber sourcing goal annually. This frequency is based on the data needs to help us manage our efforts as well as our public reporting cycle. This helps us identify potential deforestation risk remaining relating to meeting our commitment to source 100% sustainable palm oil for cooking. We met this goal for the first time in 2019. In addition, in 2018 we completed a long-term Supply Chain Sustainability Risk Assessment with WWF to identify and prioritize the environmental and social risks attributed to key commodities, including forest risks commodities. Tools, methods, and data sources referenced for biodiversity and forest risk include: WWF’s Global 200 priority ecoregions, Ramsar Sites, World Database on Protected Areas, and Alliance for Zero Extinction (AZE) sites.
(F2.1b) Which of the following issues are considered in your organization’s forests-related risk assessment(s)?

Availability of forest risk commodities

Relevance & inclusion
Relevant, always included

Please explain
As part of our supply chain management processes, we evaluate current and projected changes in commodity availability and quality, including palm oil, fiber (timber) used in our paper-based packaging and beef. We assess risk related to availability and quality of these commodities according to their supplier classification, which is based on multiple factors, including food safety risk, brand criticality (e.g. required for a core product), and financial impact (e.g. percentage of total spend and/or volume needed). Information related to the availability of forest risk commodities is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.

Quality of forest risk commodities

Relevance & inclusion
Relevant, always included

Please explain
As part of our supply chain management processes, we evaluate current and projected changes in commodity availability and quality, including palm oil, fiber (timber) used in our paper-based packaging and beef. We assess risk related to availability and quality of these commodities according to their supplier classification, which is based on multiple factors, including food safety risk, brand criticality (e.g. required for a core product), and financial impact (e.g. percentage of total spend and/or volume needed). Information related to the quality of forest risk commodities is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.

Impact of activity on the status of ecosystems and habitats

Relevance & inclusion
Relevant, always included

Please explain
We rely on third-party certification to achieve our sustainable sourcing goals and policies. The RSPO certification for palm oil and FSC, SFI, and PEFC certifications for timber allow us to evaluate current impacts of the palm oil and timber (fiber for paper-based packaging) we source on ecosystems and habitats. Because we’re still working towards our goals and only portions of our system utilize third-party certification, impact on ecosystems and habitats is only covered for those suppliers, facilities, or product lines with certification. This was included in 2018 Supply Chain Sustainability Risk Assessment completed with WWF which addresses the potential impacts of our palm oil and timber sourcing on ecosystems and habitats. We are continuing to evaluate impact of our purchasing in Brazil with WWF. Information related to the impact on ecosystems and habitats is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.
Relevance & inclusion
Relevant, always included

Please explain
As a publicly-traded, multinational corporation, we continually assess changes to local regulations associated with our activities in local markets, including with regard to our sourcing of palm oil and timber. For example, the European Parliament passed a resolution in April 2017 aiming to limit the import of palm oil that has caused deforestation and new sustainability criteria for palm oil entering the European market, potentially leading to binding legislation in Europe. After closely monitoring developments in this area, it was downgraded as a risk factor as the regulation only applies to palm oil used as biofuel. Information related to regulations is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.

Climate change
Relevance & inclusion
Relevant, always included

Please explain
Our current sustainable sourcing of palm oil and timber is intended to reduce deforestation risk and therefore mitigate our greenhouse gas emissions and impact on climate change. This was included in our 2018 Supply Chain Sustainability Risk Assessment completed with WWF which addresses the potential impacts of our palm oil and timber sourcing on ecosystems and habitats. We are continuing to evaluate impact of our purchasing in Brazil with WWF. In 2018 we began to include emissions from the procurement of fiber-based products and palm oil production in our Scope 3 estimates. We continued to refine our estimate of emissions in 2019. Information related to climate change is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.

Impact on water security
Relevance & inclusion
Relevant, always included

Please explain
The impact of our forest related activities on watersheds is included in our planning. Our ongoing commitment to source 100% of our palm oil used for cooking from responsible and sustainable sources and to purchase 100% of paper-based packaging with fiber from responsibly managed forests and recycled sources by the end of 2020 can have a direct impact on forest health, watersheds, and water security through helping to stabilize soils, reduce erosion, regulate water flow, and purify water sources. Information related to the impact on water security is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.

Tariffs or price increases
Relevance & inclusion
Relevant, always included

Please explain
Financial impact – including tariffs or price increases – is one of the key guidelines we use to assess supply risk. We subscribe to commodity services that provide regular updates on changes in production and pricing in different regions around the world. We also conduct our own internal monitoring of international trade policy and engage in advocacy and partnerships around trade issues of mutual concern. Information related to tariffs or price increases is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.

Loss of markets
Relevance & inclusion
Not relevant, explanation provided

Please explain
In general, we assess the feasibility of starting and maintaining operations in a new market, but not potential loss of market due to deforestation. Loss of market due to deforestation has not been a significant risk in the past, nor is it anticipated to be in the future, compared to other potential risks to loss of market.

Brand damage related to forest risk commodities
Relevance & inclusion
Relevant, always included

Please explain
Because of the sensitivity around forest risk commodities, we continually assess brand damage related to these commodities and leverage our progress surveys to determine the level of potential risk measured against certain external factors we track such as complaints or campaigns against major suppliers or regions of forest risk commodities. Potential risk of brand damage is also evaluated as part of our Global Supply Chain Management Protocol, which assesses the importance of the commodity to the brand (e.g. used in a core product, lack of ingredient will result in loss of sales). Information related to brand damage is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.
Corruption

Relevance & inclusion
Relevant, always included

Please explain
Our Supplier Code of Conduct requires that all applicable local laws and regulations are adhered to, including anti-corruption protections. We continually audit and monitor for compliance with these criteria as part of standard procedures. Information related to corruption is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.

Social impacts

Relevance & inclusion
Relevant, always included

Please explain
Our current sustainable sourcing and third-party certification of palm oil and timber is intended to mitigate potential social impacts. For example, our Palm Oil Sourcing Policy is consistent with the RSPO Principle of Free, Prior, and Informed Consent to prevent and resolve social and/or land conflicts. In addition to our existing sustainable sourcing strategy, we are currently conducting a Supply Chain Sustainability Risk Assessment which addresses the potential social impacts of our palm oil and timber sourcing. Information related to social impacts is used within sustainability governance structures and processes to inform decision-making. For example, due to the global risk of deforestation our sustainability, risk, and leadership teams decided to strengthen our commitment to protect forests by endorsing the New York Declaration on Forests. We include such issues on an as-needed basis with our Risk Committee and groups in the governance structure. The Risk Committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. It looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors.

Other, please specify

Relevance & inclusion
Not considered

Please explain
We do not consider any additional issues at this time.

F2.1c

(F2.1c) Which of the following stakeholders are considered in your organization’s forests-related risk assessments?

Customers

Relevance & inclusion
Relevant, always included

Please explain
As a company comprised of customer-facing brands, customers are one of our most important stakeholder groups and we are constantly monitoring and measuring insights to meet their expectations. While we don’t frequently receive feedback from customers regarding palm oil, timber and beef sourcing we respond to the occasional inquiry, publicly disclose our sourcing commitments, and track changing customer awareness and expectations. For example, we utilize Collider Lab and the Social Hive to conduct media and research studies to analyze trends as a method of engagement. In addition to direct feedback we do understand broader trends that show the customers want corporations to be aware of our impact on forests and to act a steward of our shared environment.

Employees

Relevance & inclusion
Relevant, always included

Please explain
Because the supply chain management function is responsible for global sourcing, they also provide key input on forests-related risk assessments such as priority commodities, countries of origin, and other potential supply risks. In addition, we included corporate employee perspectives on forests-related issues as a method of engagement in our 2017 corporate materiality assessment. Employees want to know that we are acting responsibly and doing our part to reduce our impact on the environment, including forests.

Investors

Relevance & inclusion
Relevant, always included

Please explain
Many sustainable, responsible and impact (SRI) investors incorporate companies’ preparedness and exposure to forests risks into their investment theses and therefore include this stakeholder. There are several methods of engagement. In 2019, we received a shareholder proposal related to deforestation in our supply chain and engaged in a dialogue with the proponents. Yum! Brands also monitors investors’ forests-related concerns by attending relevant panels at conferences hosted by investor forums like Ceres and USSIF. We also track our scores on investor publications that monitor our environmental performance, like MSCI IVA and Sustainalytics reports, to ensure investors have the correct and most up-to-date information about our sustainability performance. In addition, we included investor perspectives regarding forests-related issues in our 2017 corporate materiality assessment.
Local communities

Please explain
Given the importance of forest issues to many local communities, sustainable sourcing and third-party certification of palm oil and timber that we use is intended to mitigate potential social impacts including local communities. For example, the RSPO Principle of Free, Prior, and Informed Consent that works to prevent and resolve social and/or land conflicts within local communities. In addition to our existing sustainable sourcing strategy, we are conducted a Supply Chain Sustainability Risk Assessment which addresses the potential social impacts of our palm oil and timber sourcing. In Brazil we have been conducting a landscape analysis to better understand the impact of our activities. We understand the role we play in local communities in our supply chain.

NGOs

Please explain
Several prominent NGOs evaluate Yum! Brands' sustainability performance and engage with us on forests-related issues and therefore include this stakeholder group. We engaged with an NGO during our 2018 Supply Chain Sustainability Risk Assessment to leverage their expertise and embed their recommendations. We also participate in several multi-stakeholder roundtables such as RSPO and USRSB where NGOs are engaged. Yum! Brands listens to NGOs’ forests-related concerns in personal dialogues, industry conferences, and the media as they arise. In addition, we included NGO perspectives of forests-related issues in our 2017 corporate materiality assessment. NGOs have also been a vital part of discussions related to shareholder proposals in 2019. These discussions are part of our engagement method.

Other forest risk commodity users/producers at a local level

Please explain
Our brands will engage with other forest risk commodity users/producers if they express an interest, if there are opportunities to collaborate on shared issues or risks, and/or if required by local regulations. This can take the form of direct discussions with the suppliers in partnership with franchisees to address issues. An example was a recent engagement with a supplier not meeting our palm oil procurement practices in Southeast Asia.

Regulators

Please explain
The Yum! Brands Government Affairs team monitors emerging forests-related regulations and engages regulators on these issues when they are relevant to the success of our business operations and supply chain.

Suppliers

Please explain
Suppliers are an important partner in our business, and we consider their perspectives in our forest related studies. An important method of engagement is our annual sustainability survey where we work to gather data in support of key performance indicators. Our annual supplier surveys request information regarding the status of certification schemes, traceability, and any gaps or challenges in transitioning supply so that we can engage with suppliers regarding these risks. Any forests-related issues that cause or have the potential to cause supply chain impacts would be evaluated by our supply chain team. In 2018 a palm oil supplier, Indofood, was removed from our supply chain as part of our commitment to only working with suppliers who meet our sourcing principles. Suppliers are required to meet our product specifications and sourcing policies including environmental protection.

Other stakeholders, please specify

Please explain
We do not consider any additional stakeholders at this time.

F3. Risks and opportunities

(F3.1) Have you identified any inherent forests-related risks with the potential to have a substantive financial or strategic impact on your business?

F3.1a

How does your organization define substantive financial or strategic impact on your business?

The Audit Committee discusses risk management during regular committee meetings and receives risk review reports covering significant areas of risk from senior managers responsible for these functional areas, as well as reports from the General Counsel, Internal Audit. The Audit Committee then provides a summary to the full board. The duties of the Vice President of Global Government Affairs and Sustainability (Chief Sustainability Officer) include the representation of sustainability issues, including forest related issues, on the Yum! risk committee. This senior level committee is responsible for the evaluation and as appropriate, reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. This committee, which looks at short, medium and long-term risks, prioritizes risks based on a number of factors that impact the business including, but not limited to, financial, operational and reputational factors. More specifically, the size and scope of the potential impact are considered as are the possible duration, and whether the impact is likely to be a one-time occurrence or recurring in nature. We then consider the effect of the risk on business strategy given the risks and opportunities in both the short and long term. Therefore, forest related risks, which are embodied at the restaurant and supply chain level, are incorporated into the Company’s broader risk management process.

For the current reporting cycle, CDP has requested information regarding risks that are substantive at the corporate level and not those at the facility or business unit level. As a global, decentralized, and franchise-focused organization with a diverse supply chain, many risks (such as forests) can be important yet not rise to the provided benchmark of being financially or strategically important at a material, substantive level to the corporation. There is no single definition of what would rise to this level but for a corporation such as Yum!, a system impact (including our direct operations, supply chain, or both) of approximately 5% of net income for the annual reporting period could be considered substantive at the corporate level. While we do not believe that individual instances of forests-related risk would constitute a substantive risk to the corporation on their own due to the total size and decentralized nature of our organization as well as our ability to source from different regions of the globe if it became necessary, the potential cumulative impact of forests-related risks could become substantive over the long term.

F3.1b

For your disclosed forest risk commodity(ies), provide details of risks identified with the potential to have a substantive financial or strategic impact on your business, and your response to those risks.

- Forest risk commodity: Timber products
- Type of risk: Physical
- Geographical scale: Global
- Where in your value chain does the risk driver occur? Supply chain
- Primary risk driver: Declining ecosystem services
- Primary potential impact: Supply chain disruption

**Company-specific description**

Shortages or interruptions in the availability and delivery of food and other supplies: The packaging by our Concepts and their franchisees are sourced from a wide variety of domestic and international suppliers. We, along with our Concepts’ franchisees, are also dependent upon third parties to make frequent deliveries of supplies that meet our specifications at competitive prices. Shortages or interruptions to our Concepts’ restaurants could adversely affect the availability, quality and cost of items we use and the operations of our restaurants. Such shortages or disruptions could be caused by inclement weather, natural disasters, other a variety of other issues. Climate change influences several physical risk drivers that negatively impact timber production, including extreme weather events such as tropical cyclones and changes in precipitation and temperature, forest fires, loss of ecosystem services, reduced crop yields, and thus, availability of certified sustainable material, which is already limited. Inherent social risks such as land tenure changes and disputes, community opposition, and litigation/grievances also present risks, but have a greater potential to be mitigated than physical risk. Our supply chain group monitors potential shortages and/or interruptions so that alternative supply sources can be obtained if needed. An advantage of our global supply chain is the ability to adapt to localized shortages and/or interruptions.

**Timeframe**

>6 years

**Magnitude of potential impact**

Medium-low

**Likelihood**

Unlikely

**Are you able to provide a potential financial impact figure?**

No, we do not have this figure

**Potential financial impact (currency)**

<Not Applicable>

**Potential financial impact figure - minimum (currency)**

<Not Applicable>

**Potential financial impact figure - maximum (currency)**

<Not Applicable>

**Explanation of financial**

A shortage or interruption in the availability of supplies could increase costs and limit the availability of products critical to restaurant operations, which in turn could lead to restaurant closures and/or a decrease in sales. In addition, failure by a key supplier or distributor for our Concepts and/or our Concepts’ franchisees to meet its service requirements could lead to a disruption of service or supply until a new supplier or distributor is engaged, and any disruption could have an adverse effect on our business.
Impact of any event would be determined by geographical extent and severity of the drought. Due to the diverse and broad nature associated with this risk it is not possible to estimate the potential financial impact. Our ability to source from a diversified supplier base helps to minimize potential impacts.

**Primary response to risk**
Increased use of sustainably sourced materials

**Description of response**
In 2014 we established our sustainable paper-based packaging goal to purchase 100% of paper-based packaging with fiber from responsibly managed forests and recycled sources by the end of 2020. As of 2019, we transitioned 76% of our supply and believe that this has been an effective response in helping us mitigate supply chain disruptions attributed to declining ecosystem services. By making progress against this goal, we are improving our resilience to ecosystem vulnerability with the potential to impact our packaging supply. We work continually to maintain a diverse supply chain and positive relationships with supply chain partners by proactively establishing mitigation practices that include menu management and portfolio diversification. This minimizes the impacts on any one part of a country or distribution system due to changes in physical climate parameters. Our approach to addressing this risk has been effective. Our supply chain is diverse and robust. We continue to work with our system to meet our sustainable fiber-based packaging goal.

**Cost of response**

**Explanation of cost of response**
Due to the diverse and broad nature associated with this risk it is not possible to estimate the potential financial impact of the cost of response. The cost of forest-risk management is largely included in broader and risk management efforts. Specific costs are primarily driven by investing in education and training of key stakeholders, especially our employees responsible for procurement, to adopt and implement our strategy to mitigate risk.

Reputational and markets

**Geographical scale**
Global

**Where in your value chain does the risk driver occur?**
Supply chain

**Primary risk driver**
Increased cost of certified sustainable material

**Primary potential impact**
Increased production costs

**Company-specific description**
Because of the sensitive and controversial nature of forest-based commodities, we are exposed to inherent reputational risks such as negative media coverage, consumer market campaigns, community opposition, and land tenure changes and disputes. Our success depends in large part upon our ability and our Concepts’ franchisees’ ability to maintain and enhance the value of our brands and our customers’ loyalty to our brands. Brand value is based in part on consumer perceptions on a variety of subjective qualities. Business incidents, whether isolated or recurring, and whether originating from us, franchisees, competitors, suppliers or distributors, can significantly reduce brand value and consumer trust, particularly if the incidents receive considerable publicity or result in litigation. For example, our Concepts’ brands could be damaged by claims or perceptions about the quality or safety of our products or the quality or reputation of our suppliers, distributors or franchisees, regardless of whether such claims or perceptions are true. Similarly, entities in our supply chain may engage in conduct, human rights abuses or environmental wrongdoing, and any such conduct could damage our or our Concepts’ brands’ reputations. The risk for this driver occurs in both Direct Operations and in the Supply Chain as reputation is important for all components of our value chain. As such it is important to all of stakeholders including customers and investors.

<Not Applicable>

**Potential financial impact figure - maximum (currency)**
<Not Applicable>

**Explanation of financial**
Due to the diverse and broad nature associated with this risk it is not possible to estimate the potential financial impact. The financial implications of a damaged reputation could negatively impact our market share, stock price and brand equity. For example, same-store sales for China declined 18% in the fourth quarter of 2014 following a supply chain issue in July of that year which adversely impacted our reputation with our customers.

**Primary response to risk**
Engagement with suppliers

**Description of response**
We have resources including our Vice President of Global Government Affairs and Sustainability (Chief Sustainability Officer), Chief Communications Officer, and General Counsel to actively monitor and engage in this area. Brand teams are focused on building three iconic brands people trust and champion. To deliver this commitment to our consumers, our teams focus on developing great-tasting product options at affordable prices built on our rigorous quality and safety standards. We proactively publicly communicate the Company position on being good corporate stewards. Our Citizenship and Sustainability Report and other public disclosures such as CDP. For example, when launching we have held multiple Twitter Chats through a third-party media company called Triple Pundit to share our progress against key environmental goals to engaged stakeholders to demonstrate our commitment to transparency and maintaining a positive brand position. In addition, we regularly engage with stakeholders, including suppliers, to support our Enterprise-wide goal of sustainable sourcing of fiber for paper-based packaging and to better understand potential changes in supply and new product innovations. By continuing our supplier engagement and monitoring the progress against our sustainable sourcing goals, we are improving our resilience to reputational risks with the potential to impact our packaging supply.

**Cost of response**

Explanation of financial
Due to the diverse and broad nature associated with this risk it is not possible to estimate the potential financial impact.

Primary response to risk
More ambitious forest-related commitments

Description of response
Our strategy begins by sourcing beef from origins of lower deforestation risk as much as possible. In 2019, over 99% of our beef volume was sourced from regions of lower deforestation risk. A second aspect of our approach is to offer non-beef menu options. Taco Bell has a robust offering of non-beef menu items, including vegetarian, that provides consumer options. They are making vegetarian options easier to access with “Veggie Mode”, a feature that transforms the menu on self-service kiosks in the U.S. to show only vegetation items. Our brands also continue to explore and test meat substitutes. Taco Bell, our leader in beef volume, is also our leader in beef substitutes with menu items such as the “Oatrageous Taco” which is sold in European markets. At this this time we are unable to provide the financial impact. As part of our efforts,
Yum! endorsed the New Declaration on Frosts (NYDF) and believe it is an important step toward us meeting the private sector goal of elimination deforestation from the production of agricultural commodities and halving the rate of loss of natural forests globally by 2020 and striving to end natural forest loss by 2030. We are continuing to expand reporting in this space, and this is our first year reporting Cattle to CDP. Yum! has worked with WWF to conduct a global supply chain risk assessment across our food and agricultural commodities and on a Brazil landscape assessment that will inform our future sourcing strategy and reporting.

**Cost of response**

**Explanation of cost of response**

Due to the diverse and broad nature associated with this risk it is not possible to estimate the potential financial impact of the cost of response. The cost of forest-risk management is largely included in broader and risk management efforts. Specific costs are primarily driven by investing in education and training of key stakeholders, especially our employees responsible for procurement, to adopt and implement our strategy to mitigate risk.

### F3.2

**(F3.2) Have you identified any forests-related opportunities with the potential to have a substantive financial or strategic impact on your business?**

### F3.2a

**(F3.2a) For your selected forest risk commodity(ies), provide details of the identified opportunities with the potential to have a substantive financial or strategic impact on your business.**

**Forest risk commodity**

- Timber products

**Type of opportunity**

- Markets

**Where in your value chain does the opportunity occur?**

- Direct operation
- Supply chain

**Primary forests-related opportunity**

- Increased demand for certified materials

**Company-specific description & strategy to realize opportunity**

In order to realize this opportunity, our strategy is to continue to work toward our published goals to prevent deforestation, including our commitment to source 100% sustainable fiber-based packaging by 2020 as well the commitments made through our endorsement of the New York Declaration on Forests. Our annual Yum! sustainability survey provides data so that the brands as a tool to manage progress toward achieving these goals as well as to provide the opportunity to engage with suppliers on the topic. We will continue to communicate and inform stakeholders on our progress.

**Estimated timeframe for realization**

- 1-3 years

**Magnitude of potential impact**

- Medium-low

**Likelihood**

- More likely than not

**Are you able to provide a potential financial impact figure?**

- No, we do not have this figure

**Potential financial impact figure (currency)**

- Not Applicable

**Potential financial impact figure – minimum (currency)**

- Not Applicable

**Potential financial impact figure – maximum (currency)**

- Not Applicable

**Explanation of financial impact figure**

Due to the diverse and broad nature associated with this opportunity it is not possible to estimate the potential financial impact. The financial implications of a driving demand for sustainable materials could positively impact our ability to source sustainable material and meet external stakeholder expectations to fulfill our public goal of sourcing 100% sustainable fiber for paper-based packaging by the end of 2020.

**Forest risk commodity**

- Palm oil

Cattle products

Type of opportunity
Products & services

Where in your value chain does the opportunity occur?
Direct operation
Supply chain

Primary forests-related opportunity
Increased brand value

Company-specific description & strategy to realize opportunity
We continue the exploration of non-beef-based menu items in response to consumer interest. Taco Bell, our leader in beef volume, is also our leader in vegetarian offerings including the development of products with meat substitutes. An example is our “Outrageous Taco” which is sold in European markets that contains a meat substitute.

Estimated timeframe for realization
>6 years

Magnitude of potential impact
Medium-low

Likelihood
More likely than not

Are you able to provide a potential financial impact figure?
No, we do not have this figure

Potential financial impact figure (currency)
<Not Applicable>

Potential financial impact figure – minimum (currency)
<Not Applicable>

Potential financial impact figure – maximum (currency)
<Not Applicable>

Explanation of financial impact figure
Due to the diverse and broad nature associated with this opportunity it is not possible to estimate the potential financial impact. The financial implications of a driving demand for sustainable meat substitute menu items could develop consumer interest in some markets.

F4. Governance
Is there board-level oversight of forests-related issues within your organization?

Yes

Identify the position(s) of the individual(s) (do not include any names) on the board with responsibility for forests-related issues.

<table>
<thead>
<tr>
<th>Position of individual</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chief Executive Officer (CEO)</td>
<td>As the top operational decision-maker and member of the Board of Directors, the CEO has ultimate responsibility for forests-related issues, including goals for certified palm oil, fiber-based products, and cattle. The Audit Committee of the Board of Directors is updated annually on the Company’s environmental commitments and progress. Within the management structure, the CEO entrusts the Vice President of Global Government Affairs and Sustainability (CSO) to drive our company forests strategy. This individual is responsible for: - Leveraging sustainability to promote business growth, drive brand equity and minimize business, social and financial risks of Yum! Brands’ global business enterprise - Focusing on the scope of the business model for the entire business enterprise globally (Franchisee and Corporate) - Ensuring Yum! Brands operates efficiently and sustainably - Updating of the Audit Committee on an annual basis regarding the Company’s environmental commitments and progress.</td>
</tr>
</tbody>
</table>

Provide further details on the board’s oversight of forests-related issues.

<table>
<thead>
<tr>
<th>Frequency that forests-related issues are a scheduled agenda item</th>
<th>Governance mechanisms into which forests-related issues are integrated</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scheduled - some meetings</td>
<td>Monitoring implementation and performance</td>
<td>Yum! Brands believes that good corporate governance is a critical factor in achieving business success and embraces practices that align with management and shareholder interests. Oversight for environmental, social and governance (ESG) issues ultimately resides with the Yum! Brands Board of Directors, which is briefed through its Audit Committee on an annual basis. The brief typically is performed by our General Counsel and/or our Vice President of Global Government Affairs and Sustainability (Chief Sustainability Officer). The governance and management mechanisms that have been implemented contribute to board oversight on forest issues. We utilize these mechanisms to directly identify, evaluate, manage and track forest issues. Key topics for the reporting year included setting of our updated sustainability strategy and progress against goals including our forests-related targets.</td>
</tr>
</tbody>
</table>
(F4.2) Provide the highest management-level position(s) or committee(s) with responsibility for forests-related issues (do not include the names of individuals).

<tr>
<td>Chief Sustainability Officer (CSO)</td>
<td>Both assessing and managing forests-related risks and opportunities</td>
<td>Annually</td>
<td>The Vice President of Global Government Affairs and Sustainability (Chief Sustainability Officer) chairs the ESG Council and is responsible for coordinating the execution of the strategy, including forests-related issues such as goals for certified palm oil, fiber-based products, and cattle. This senior leader works with sustainability leads at KFC, Pizza Hut, Taco Bell and Yum! corporate to execute the strategy. Duties include the annual representation of sustainability issues, including forests, on the Yum! risk committee. This senior level committee is responsible for the evaluation and as appropriate, annual reporting of possible corporate risk to the Audit Committee of the Board of Directors for inclusion in our public filings. The committee prioritizes risks based on factors that impact the business. The CSO typically presents metrics that relay the progress we have made toward our goals. The size and scope of the potential impact are considered as are the possible durations, and whether the impact is likely to be a one-time occurrence or recurring in nature. We then consider the effect of the risk on business strategy given the risks and opportunities in both the short and long term. We maintain an ESG Working Group within Yum! corporate including representation from government relations, legal, finance and communications that engage in ongoing efforts such as our materiality assessment, disclosures to sustainability ratings agencies, and our citizenship report.</td>
</tr>
</tbody>
</table>

(F4.3) Do you provide incentives to C-suite employees or board members for the management of forests-related issues?

</tr>
</thead>
<tbody>
<tr>
<td>Monetary reward Chief Sustainability Officer (CSO)</td>
<td>Achievement of commitments and targets</td>
<td>The Vice President of Global Government Affairs and Sustainability (Chief Sustainability Officer) is responsible for leading the execution of the Yum! sustainability strategy, including forests-related issues. Performance of the corporation is factored into incentives. Forests-related goals are delegated to the appropriate business management units/divisions and teams within those business management units/divisions. Performance against these goals impact overall performance scores and compensation adjustments for employees who are accountable for the achievement of our goals. Monetary rewards (such as incentives) are distributed based on company performance and are awarded once we achieve our forests-related commitments and targets. Performance against these commitments and goals is reviewed and calculated on an annual basis and has historically been reported in our annual sustainability report. Employees who are accountable for the achievement of our goals are subject to receive various bonuses and compensation adjustments. These bonuses are calculated as a percentage of our salary and vary according to the level of leadership.</td>
</tr>
<tr>
<td>Non-monetary reward Chief Sustainability Officer (CSO)</td>
<td>Achievement of commitments and targets</td>
<td>Achievements that drive business results, including those that reduce the Company’s environmental impacts, are recognized by non-monetary recognition awards. Recognition is an integral part of the Yum! Brands culture and everyone across the Company is encouraged to celebrate the achievements of others. All leaders in the Company, including the Vice President of Global Government Affairs and Sustainability (Chief Sustainability Officer) have unique personal recognition awards. Awards that have been given for progress in achieving sustainability targets include our “Positive Spark” award which has been presented to employees for their contributions toward our sustainability targets. For example, associates in China and France have received the “Positive Spark” award for sustainability initiatives such as LEED restaurant development. We also have given our “Green Apple” award for contributions toward sustainability education within the company. Individuals in the U.K., China, Australia and the United States have received this recognition. Employees who contribute to the success of Yum! Brands are eligible for the “Achieving Breakthrough Results” award. This award involves recognition, non-monetary rewards, and a monetary reward or equity grant for efforts that drive breakthrough results for the Company. It has been awarded to employees who are helping to achieve our sustainability targets through efforts such as our Citizenship Report and CDP responses.</td>
</tr>
</tbody>

(F4.4) Did your organization include information about its response to forests-related risks in its most recent mainstream financial report? Yes (you may attach the report – this is optional) 2019 Annual Report - Form 10K Yum! Brands.pdf

(F4.5) Does your organization have a policy that includes forests-related issues? Yes, we have a documented forests policy that is publicly available

(F4.5a)
Yum! Brands, Inc. is committed to our policies to prevent deforestation and forest degradation and have created them with the material content to drive improvement. All policies are public and apply to all stages of our value chain, including our equity restaurants, franchisees, and suppliers. For palm oil, we are committed to continuing meeting our commitment to using 100% certified product for cooking. We give preference to suppliers that are certified by the Roundtable on Sustainable Palm Oil (RSPO), and only source palm oil from suppliers whose operations meet our Palm Oil Policy principles, Yum! Brands Supplier Code of Conduct, and Human and Labor Rights Policy which address HCV, HCS, peatland, legality, certification, and human rights. For Timber, we implemented a Paper-Based Packaging Sourcing Policy which addresses HCV, legality, certification, recycled content, and human rights. We give preference to suppliers with third-party certification, the most rigorous of which is FSC. We also recognize other national certifications endorsed by the Programme for the Endorsement of Forestry Certification (PEFC) and the Sustainable Forestry Initiative (SFI), provided the fiber avoids the unwanted sources listed in our Sustainable Sourcing Principles. Our policy is publicly-available on the Citizenship section of our company webpage. We typically review and/or update the policy on a biannual basis. Our endorsement of the New York Declaration on Forests (NYDF) is a milestone. We believe that endorsing the NYDF is an important step forward and we look forward to supporting and helping to meet the global private sector goal of eliminating deforestation from the production of agriculture commodities such as palm oil, soy, paper and beef products no later than 2020, in addition to at least halving the rate of loss of natural forest globally by 2020 and striving to end natural forest loss by 2030. Our policies inform our supply chain decision-making process. All suppliers are required to follow our policies as outlined in our Supplier Code of Conduct. Timber and palm oil suppliers have been removed from our system as a result of not addressing our policies.

(F4.5b) Do you have commodity specific sustainability policy(ies)? If yes, select the options that best describe their scope and content.

No cutoff date

**Commitment target date**

2020

Please explain

Our commodity-specific policies address several deforestation and forest degradation criteria. Our sustainable fiber for paper-based packaging policy addresses HCV, legality, certification, and human rights. Our goal is to purchase 100% of paper-based packaging with fiber from responsibly managed forests and recycled sources by the end of 2020. These commitments are rolling in nature and therefore do not have a cutoff date.

**Forest risk commodity**

**Timber products**

**Criteria**

- Zero gross deforestation/ no deforestation
- Restoration and compensation to address past deforestation and conversion
- Avoidance of negative impacts on threatened and protected species and habitats
- No conversion of High Conservation Value areas
- No conversion of High Carbon Stock forests
- No sourcing of illegally produced and/or traded forest risk commodities
- No sourcing of forest risk commodities from unknown/controversial sources
- Restricting the sourcing and/or trade of forest risk commodities to credible certified sources

**Operational coverage**

Supply chain

**% of total production/ consumption covered by commitment**

<td>Our materiality assessment confirmed that sustainable sourcing was one of our top material issues. This materiality assessment was used in the renewal of our global citizenship and sustainability strategy that reflects our corporate mission to build the world’s most loved, trusted &amp; fastest growing restaurant brands. Our sustainability strategy, called the Recipe for Good, is one of the two parts of our corporate vision. Together, with the Recipe for Growth it guides our company. Both are critical for the long-term success of our long-term business objectives. Our Recipe for Good unless our employees, franchisees and suppliers on the priorities that matter and will keep us focused on socially responsible growth, managing risks and serving more goodness to our customers, shareholders, communities and the planet. This is reflected in our fundamental long-term sustainability objectives. First, it is to design, build and operate restaurants to be measurably more sustainable using green building standards to drive reductions in energy, GHG emissions, waste and water use and to report progress annually through CDP disclosures. Second is to work to elevate the supply chain to reduce deforestation though objectives including the sourcing 100% of palm oil used for cooking and paper-based packaging from responsible and sustainable sources. Our specific, global palm oil and fiber-based packaging policies apply to all brands, regions, countries and suppliers within our operational control. In addition, compliance with these policies is required through our Global Supplier Code of Conduct. Progress is tracked and reported on an annual basis through our global surveys. One example of the incorporation of these long-term business objectives is our endorsement of the New York Declaration on Forests (NYDF). We believe that endorsing the NYDF is an important step forward and we look forward to helping to meet the global private sector goal of eliminating deforestation from the production of agriculture commodities such as palm oil, soy, paper and beef products no later than 2030, in addition to at least halving the rate of loss of natural forest globally by 2020 and striving to end natural forest loss by 2030. Yum! Brands currently defines our long-term time horizon as any time period greater than five years. We have selected the threshold that best fits our definition.</td>

Our sustainability strategy, called the Recipe for Good, is one of the two parts of our corporate vision. Together, with the Recipe for Growth it guides our company. Both are critical for the long-term success of our long-term business objectives. Our Recipe for Good unless our employees, franchisees and suppliers on the priorities that matter and will keep us focused on socially responsible growth, managing risks and serving more goodness to our customers, shareholders, communities and the planet. This is reflected in our fundamental long-term sustainability objectives. First, it is to design, build and operate restaurants to be measurably more sustainable using green building standards to drive reductions in energy, GHG emissions, waste and water use and to report progress annually through CDP disclosures. Second is to work to elevate the supply chain to reduce deforestation though objectives including the sourcing 100% of palm oil used for cooking and paper-based packaging from responsible and sustainable sources. Our specific, global palm oil and fiber-based packaging policies apply to all brands, regions, countries and suppliers within our operational control. In addition, compliance with these policies is required through our Global Supplier Code of Conduct. Progress is tracked and reported on an annual basis through our global surveys. One example of the incorporation of these long-term business objectives is our endorsement of the New York Declaration on Forests (NYDF). We believe that endorsing the NYDF is an important step forward and we look forward to helping to meet the global private sector goal of eliminating deforestation from the production of agriculture commodities such as palm oil, soy, paper and beef products no later than 2030, in addition to at least halving the rate of loss of natural forest globally by 2020 and striving to end natural forest loss by 2030. Yum! Brands currently defines our long-term time horizon as any time period greater than five years. We have selected the threshold that best fits our definition.</td>

**Target year**
- 2020

**Quantitative metric**
- <Not Applicable>

**Target (number)**
- <Not Applicable>

**Target (%)**
- 100

**% of target achieved**
- 76

**Please explain**
Our public goal is to purchase 100% of paper-based packaging with fiber from responsibly managed forests and recycled sources by the end of 2020. This goal was chosen because Yum! sources a large volume of paper-based packaging and we are committed to using environmentally preferable packaging that reduces our impact on the environment and communities where we operate. Our public policy gives explicit preference to suppliers who provide paper packaging certified by a third-party who meets the most rigorous forest management standards, which is FSC. We also accept PEFC and SFI certifications. Yum!'s sustainable sourcing policies and principles are intended to mitigate our impact on climate change by reducing deforestation relating to the timber that we source. To track our progress, we survey business units worldwide regarding their accomplishments against our sourcing goals. We have worked with key franchisees to achieve results and have also worked to educate suppliers and when necessary remove them from our supply chain.

**Please explain**
Approximately 93% of the beef used by Yum! brands is by our Taco Bell brand and this is the focus of the target. Though the development and issuing of our sustainability survey we are working to deepen the understanding of the origins of our beef supply. This includes but is not limited to traceability and certification. We know that approximately 99% of our beef comes from origins of lower deforestation risk. This work is foundational and is a first step in our commitment to the New York Declaration on Forests.
(F6.2) Do you have traceability system(s) in place to track and monitor the origin of your disclosed commodity(ies)?

Our public policy states that we will give preference to suppliers who provide paper-packaging certified by a third-party, which meets the most rigorous forest management standards, which is currently FSC. However, to account for market differences, we also recognize other national certifications endorsed by the PEFC and SFI, provided the fiber avoids the unwanted sources listed in our Sustainable Sourcing Principles. We issued a global survey for our entire business, through our brands, requesting that all suppliers report on fiber used in our paper-based packaging in 2019. The responses we received represent 91% of our global store count of over 50,000 restaurants. An estimated 47% of our paper-based packaging volume supply came from certified sources of virgin fiber based on reported data. An additional estimated 29% of our reported paper-based packaging came from recycled sources. Non-recycled, non-certified paper-based packaging currently is estimated to be 24% of our supply based on reported data. Our public goal is to reach 100% of fiber used in paper packaging from responsible and recycled sources by the end of 2020.

Please explain
Currently we do not have a global requirement for beef provided to the brands to be third-party certified with the listed sustainability standards. These standards for beef need to be better developed and more widely adopted to enable this evolution. However, we do ask suppliers to provide information on all certifications that they use for their products thereby encouraging them to continue to adopt standards. We are continuing to work with suppliers to refine data gathering.

Description of control systems
Suppliers are required to adhere to all environmental policies established by Yum! as stated in the Yum! Global Supplier Code of Conduct. Our policy for fiber-based packaging includes using third-party certification systems to demonstrate compliance. This is done on an annual basis. Yum! recognizes systems including FSC, PEFC and SFI and requests that suppliers provide the volume of material and specific certification system used. This data is compiled and reviewed to ascertain compliance with the policy, progress on goals and whether corrective measures (up to and including removal from the Yum! supply chain) are warranted. Our goal for suppliers to use certified or recycled materials is set for the end of 2020. In addition to adhering to this certification, we reserve the right to address suppliers not conforming to our policy with evidence of bad behavior.

Suppliers are required to adhere to all environmental policies established by Yum! as stated in the Yum! Global Supplier Code of Conduct. Our policy for cattle does not require a certification system to demonstrate compliance, however, we do recognize and encourage third-party certification systems. Voluntary reporting in beef certification schemes is done on an annual basis. Yum! requests that suppliers provide the volume of material and specific certification system used. This data is compiled and reviewed to ascertain compliance with the policy, progress on goals. Our commitment is to procure beef in accordance with our endorsement of the NYDF. As such we have begun working to better understand the sourcing of beef within our system. We reserve the right to address suppliers not conforming to our policy with evidence of bad behavior. The focus is on suppliers with exposure to areas of higher tropical deforestation risk.

**Procedures to address and resolve non-compliance with suppliers**

- Developing time-bound targets and milestones to bring suppliers back into compliance
- Providing information on appropriate actions that can be taken to address non-compliance
- Assessing the efficacy and efforts of non-compliant supplier actions through consistent and quantified metrics
- Re-integrating suppliers back into supply chain based on the successful and verifiable completion of activities

**Please explain**

Suppliers are required to adhere to all environmental policies established by Yum! as stated in the Yum! Global Supplier Code of Conduct. Our policy for cattle does not require a certification system to demonstrate compliance, however, we do recognize and encourage third-party certification systems. A challenge that we face in moving toward setting a requirement is the lack of a robust, well adopted third-party system. Voluntary reporting in beef certification schemes is done on an annual basis. Yum! requests that suppliers provide the volume of material and specific certification system used. Our commitment is to procure beef in accordance with our endorsement of the New York Declaration on Forests. We reserve the right to address suppliers not conforming to our policy with evidence of bad behavior. The focus is on suppliers with exposure to areas of higher tropical deforestation risk. Yum! supply chain leaders are responsible for evaluating the severity of non-compliance, developing corrective action plans and if necessary, removal of suppliers from the system in consultation with other functions and partners. In 2019, an estimated 99% of total beef volume was sourced from countries of low deforestation risk and 84% of our responding suppliers reported low-risk origins. Please note that this is our first year reporting this commodity and as such, we took forward to improving our ability to gather and report on this information in the future.

### F6.6a

**(F6.6a) For you disclosed commodity(ies), indicate how you ensure legal compliance with forest regulations and/or mandatory standards.**
Timber products

Procedure to ensure legal compliance
As part of our annual sustainability survey, we request all fiber-based product suppliers to state if are in compliance with the Brazilian Forest Code and request the monitoring approach and key performance indicators for any supplier that designates Brazil as a country of origin for their timber commodities. In 2019, approximately 100% of our timber suppliers that sourced from Brazil reported that they monitor and ensure compliance with the Brazilian Forest Code. Compliance is tracked using Certifications from Forest Stewardship Council (FSC) Brazil and The Programme for the Endorsement of Forest Certification (PEFC); Certificates of Origin; Chain of Custody Certification Reports; and audits of the certification companies. The number of suppliers represents a rounded estimate based on the number of timber suppliers that responded to the Survey for 2019. Supplier responses to the survey are indications, but not assurance, of legal compliance.

Law and/or mandatory standard(s)
Brazilian Forest Code

Comment
Suppliers are subject to the Yum! Supplier Code of Conduct. Suppliers are required to provide products/services that comply with all applicable laws, rules and regulations in the state and/or country in which they operate as well as to adhere to all requirements set out in this Code. Applicable laws and regulations include local, federal and international codes, rules and regulations as well as applicable treaties and industry standards. Furthermore, the Code states that suppliers must ensure compliance with industry environmental, agricultural and animal welfare standards and practices, as applicable. Any reported breaches in the Code of Conduct are reviewed and acted upon in accordance with the policy and any legal requirements. Third party certifications are used as indications, but not assurance, of legal compliance.

Palm oil

Procedure to ensure legal compliance
As part of our annual sustainability survey, we request all palm oil suppliers for cooking oil to state if are in compliance with the Brazilian Forest Code and request the monitoring approach and key performance indicators for any supplier that designates Brazil as a country of origin for their palm oil commodities. In 2019, no palm oil suppliers reported sourcing of palm oil for cooking from Brazil. Supplier responses to the survey are indications, but not assurance, of legal compliance.

Please explain

Our endorsement of the New York Declaration on Forests (NYDF) is a milestone. We believe that endorsing the NYDF is an important step forward and we look forward to supporting and helping to meet the global private sector goal of eliminating deforestation from the production of agriculture commodities such as palm oil, soy, paper and beef products no later than 2020, in addition to at least halving the rate of loss of natural forest globally by 2020 and striving to end natural forest loss by 2030. We worked with WWF between 2013 and 2014 to develop our initial public policy and goal, and continued to partner with them in 2017-2018 to complete a supply chain sustainability risk assessment of key commodities, including Timber. Our engagement with our partner WWF continued in 2019 with a focus on the Brazil supply chain. This includes a landscape analysis and strategic plan to better understand how to reduce deforestation risks.

(F6.11a) Provide details on your project(s), including the extent, duration, and monitoring frequency. Please specify any measured outcome(s).

Project reference
Project 1

Project type
Forest ecosystem restoration

Primary motivation
Voluntary

Description of project
In 2019, we endorsed the New York Declaration of Forests and are working to at least halve the rate of loss of natural forests globally and strive to end natural forests loss by 2030. Our support of this project includes Goal 5 of the New York Declaration of Forests, which is to restore 150 million hectares of degraded landscapes and forestlands by 2020 and significantly increase the rate of global restoration thereafter, which would restore at least an additional 200 million hectares by 2030. To date, the project has been applied in 22 countries with 45 Million hectares under restoration, including Brazil, El Salvador, Mexico, Rwanda, Sri Lanka, United States, Burundi, Cameroon, Colombia, Costa Rica, Democratic Republic of Congo, Ghana, Guatemala, India, Côte d'Ivoire, Kenya, Malawi, Mozambique, Uganda, Ethiopia, Madagascar, and Togo. For the purposes of this disclosure, we have selected the USA as the project country. Please note that reported details represent the progress of the entire project, which we support.
