

# YUM! BRANDS SUSTAINABLE PACKAGING POLICY

Yum! Brands is committed to using sustainable packaging that reduces our impact on the environment and the communities where we operate. We engage with stakeholders including suppliers, manufacturers, converters, distributors and retailers to support our enterprise-wide approach. The Yum! Sustainable Packaging Policy includes the following policies and commitments:

- [Yum! Brands Paper-based Packaging Sourcing Policy](#)
- [Yum! Brands Paper-based Packaging Fiber Commitment](#)
- [Yum! Brands Styrofoam Commitment](#)
- [Yum! Brands U.S. Corporate Offices Plastic Packaging Commitment](#)
- [KFC Global Packaging Commitment](#)
- [Taco Bell Global Packaging Commitment](#)

## YUM! BRANDS PAPER-BASED PACKAGING SOURCING POLICY

Yum! Brands is committed to making sustainable packaging a priority. In support of this commitment, we have developed the following Sustainable Sourcing Principles:

1. Yum! Brands will not knowingly buy paper-based packaging products that were made with fiber that comes from illegal or the following unwanted sources:
  - a. Wood harvested from forests that have been converted to plantations or non-forest use
  - b. Wood from high conservation value forests, unless those forests are credibly certified
  - c. Wood where the source forest and species are unknown
  - d. Wood harvested in a manner that violates human rights
  - e. Wood harvested that violates local or international laws
2. We will give preference to suppliers who provide paper-packaging certified by a third-party, which meets the most rigorous forest management standards. Currently the Forest Stewardship Council (FSC) standard is considered the most rigorous forest certification by leading conservation organizations. However, we must manage this aspiration in the context of technical requirements, uneven supply, and other business and regulatory considerations. Therefore, we also recognize certifications from other national certifications endorsed by the Programme for the Endorsement of Forestry Certification (PEFC) and the Sustainable Forestry Initiative (SFI), provided the fiber avoids the unwanted sources listed above.
3. Yum! Brands is committed to sustainable packaging by increasing the amount of recycled content, as permitted by regulatory and technical constraints, across our global system. This is done within packaging content regulations to help ensure food safety, as well as within performance criteria to retain functionality. Though limited availability of suitable recycled fiber restricts our access to the supply of these materials in some geographical areas, we will work to leverage sustainable practices into all of our wrappers, napkins, and containers worldwide.
4. To show compliance with this sourcing policy, suppliers should substantiate their claims that fibers used to produce the paper-packaging were legally harvested and traded and that they do not come from unwanted sources as outlined above.

## YUM! BRANDS PAPER-BASED PACKAGING FIBER COMMITMENT

Yum! will purchase 100% of paper-based packaging with fiber from responsibly managed forests and recycled sources by the end of 2020.

## YUM! BRANDS STYROFOAM AND EXPANDED POLYSTYRENE COMMITMENT

Yum! will accelerate efforts to remove Styrofoam and Expanded Polystyrene (EPS) globally by 2022 across all KFC, Pizza Hut and Taco Bell locations.

## YUM! BRANDS U.S. CORPORATE OFFICES PLASTIC PACKAGING COMMITMENT

Yum! corporate U.S. offices in Louisville, Ky., Plano, Texas, Irvine, Calif., and Chicago, will move all plastic packaging to be reusable, recyclable or compostable by the end of 2020.

## KFC GLOBAL PACKAGING COMMITMENT

KFC pledged that all plastic-based, consumer-facing packaging will be recoverable or reusable by 2025. The goal supports KFC's long-term plan to implement a more sustainable packaging strategy in its restaurants - by both developing and using sustainable packaging options - and builds on progress already made in some markets to eliminate plastic packaging items.

## TACO BELL GLOBAL PACKAGING COMMITMENT

Taco Bell will make all consumer-facing packaging recyclable, compostable or reusable, remove all added PFAS, Phthalates and BPA from consumer-facing packaging materials, and add recycling and/or composting bins, where infrastructure permits in restaurants across the globe by 2025.

## PROGRESS REPORTING

Progress against global goals will be reported through the annual reporting made public under Yum! Brands Global Citizenship and Sustainability disclosures or through global reporting frameworks, such as the CDP.
