

# PLANET 2019 Performance Summary

	Goal	Status
<b>Green Buildings</b> Design, build and operate restaurants to be measurably more sustainable using green building standards to drive reductions in energy consumption, water use, greenhouse gas (GHG) emissions and waste.	 <b>Reduce</b> average restaurant energy and GHG emissions by an additional <b>10%</b> , from our 2017 baseline, by the end of 2025.	<ul style="list-style-type: none"> <li>Since 2018, we reduced our company GHG emissions 8.5% on a per-restaurant average.</li> <li>In 2019, our system environmental efforts for restaurants avoided the release of 723,922 MTCO<sub>2</sub>e, the equivalent of the annual emissions of 156,399 passenger vehicles driven for a year.</li> </ul>
	Yum!'s corporate U.S. offices will use <b>100%</b> renewable energy by the end of 2020.	We purchased renewable energy credits, entered into a power purchasing agreement to offset our electricity use and are exploring onsite options for the future.
	 Reduce average restaurant water consumption by <b>10%</b> , from our 2017 baseline, by the end of 2025.	<ul style="list-style-type: none"> <li>Since 2017, water consumption on a per-restaurant basis has increased due to the use of expanded reporting and more usage.</li> <li>In 2019, our conservation measures helped avoid the use of <b>295,905,766</b> gallons of water.</li> <li>The World Resources Institute, Aqueduct 3.0, determined <b>17%</b> of our restaurants are located in areas of high water risk.</li> </ul>
	Divert <b>50%</b> of back-of-house operational waste, measured by weight, generated in our U.S. restaurants by the end of 2020. 	<ul style="list-style-type: none"> <li>In 2019, we estimate that <b>964,739</b> tons of solid material was removed from our U.S. restaurants and we avoided the disposal of <b>20%</b> of that waste.</li> <li>Taco Bell will add recycling and/or composting bins to restaurants where infrastructure permits.</li> <li>KFC Australia diverted about <b>40%</b> of its waste in 2019.</li> </ul>
	Reduce food loss waste <b>50%</b> by 2030 in accordance with U.S. Food Loss and Waste 2030 Champions.	Yum! Brands and our franchisees donated <b>5.95 million</b> pounds of food in 2019, with <b>33</b> countries participating.
<b>Supply Chain</b> Engage in building a responsible supply chain that protects forests, respects human rights, supports sustainable sourcing and enables good stewardship.	By 2025, KFC plastic-based, consumer-facing packaging will be recoverable or reusable globally. By 2025, Taco Bell consumer-facing packaging will be recyclable, compostable or reusable globally with chemical additives of concern removed. As intermediate steps, Taco Bell is committed to making all cups recyclable by 2021, and Yum! will remove Styrofoam and expanded polystyrene from all packaging by 2022, as well as meet the goal in its U.S. corporate offices by the end of 2020.	<ul style="list-style-type: none"> <li>The first global survey of purchased plastics was conducted to collect 2019 data. While there is still work to do when it comes to refining our data collection, approximately <b>18%</b> of resins come from recycled sources, <b>14%</b> pre-consumer and <b>4%</b> post-consumer. Expanded polystyrene, of which Styrofoam is a component, consists of <b>2%</b> of the reported plastic used by our system.</li> <li>KFC markets are working with suppliers to identify, test and implement solutions. Some markets, including Canada, France, Romania and Singapore, have implemented plastic straw bans.</li> </ul>
	Source <b>100%</b> of palm oil used for cooking from responsible and sustainable sources by the end of 2019.	In 2019, <b>100%</b> of palm oil used for cooking was certified sustainable by the Roundtable for Sustainable Palm Oil. We continue to look for opportunities to reduce the environmental footprint of our palm oil use.
	Purchase <b>100%</b> of our paper-based packaging with fiber from responsibly managed forests and recycled sources by the end of 2020.	In 2019, an estimated total of <b>76%</b> of fiber came from certified forests or recycled sources.
	Endorsed the New York Declaration on Forests (NYDF) and the private sector goal of eliminating deforestation from the production of agriculture commodities such as palm oil, soy, paper and beef products no later than 2020; halving the rate of loss of natural forest globally by 2020; and striving to end natural forest loss by 2030.	<ul style="list-style-type: none"> <li>In 2019, <b>100%</b> of Brazilian feed mills in our supply chain were audited as compliant in aligning with the Amazon Soy Moratorium to help protect tropical forests.</li> <li><b>99%</b> of our reported beef supply was sourced from origins of low-risk tropical deforestation in 2019.</li> <li>In 2019, we disclosed information on our beef usage through CDP Forests.</li> </ul>
